Education

Computer Systems Technology

Jan 2023 – Dec 2024 | Burnaby, BC

British Columbia Institute of Technology (BCIT) 🌐

Object-Oriented Programming, Data Structures & Algorithms, Cloud Computing with AWS, Software Architecture, Mobile App Development, Networking & Security, Serverless Computing

Bachelor of Transportation Technology and Management

Sep 2011 – Jun 2015 | Taichung, Taiwan

Feng Chia University 🌐

Professional Skills

Languages — JavaScript, TypeScript, HTML/CSS, Python, Java, C, R, SQL

Frameworks & Libraries — React, Node.js, Express.js, RESTful APIs, FastAPI, Bootstrap

Technologies & Tools — MySQL, Git, Postman, Swagger/OpenAPI, Bash/Shell scripting, Figma

Cloud & DevOps — AWS, Docker, Kubernetes, Terraform, Jenkins, Linux (Ubuntu)

Projects

Course Scheduler

Nov 2024 – Dec 2024

[React](#) | [Node.js](#) | [REST APIs](#) | [Tailwind CSS](#) | [AWS services](#)

- Built a full-stack academic scheduling platform to support role-based course management for students, faculty, and administrators.
- Designed scheduling workflows and timetable management logic to improve course planning efficiency and reduce scheduling conflicts.
- Developed interactive and responsive user interfaces with React and Tailwind CSS to improve timetable visibility and usability.
- Implemented secure CRUD operations and backend services to support real-time scheduling updates.
- Deployed scalable cloud infrastructure using AWS Lambda, API Gateway, and DynamoDB.

AI Steps

Oct 2024 – Nov 2024

[Python](#) | [REST APIs](#) | [MySQL](#) | [OpenAPI/Swagger](#) | [LLM Integration](#)

- Developed backend API services in Python to process user requests and integrate LLM-powered recommendation workflows.
- Integrated external AI APIs and database operations to generate personalized location recommendations.
- Designed and documented RESTful endpoints using Swagger/OpenAPI for maintainability and team collaboration.
- Optimized API testing and debugging workflows to improve backend reliability and performance.
- Improved database interaction and request handling to support scalable recommendation processing.

Experience

Cloud & Full Stack Developer - Intern

May 2024 – May 2024 | Vancouver, BC

AWDEA (Adults with Disability Entertainment Access)

[React](#) | [Node.js](#) | [MongoDB](#) | [Stripe API](#) | [AWS Lambda](#)

- Contributed to a scalable full-stack nonprofit platform supporting accessibility-focused event workflows.
- Developed secure admin tools and integrated Stripe payment workflows, helping raise over \$3,000 in donations shortly after launch.
- Automated raffle selection and event scheduling workflows using AWS Lambda and EventBridge, reducing manual administrative work.
- Improved application performance and content delivery using AWS CloudFront CDN to enhance user experience.
- Collaborated on cloud-based workflow improvements to support platform scalability and operational efficiency.

Service industry experience

Oct 2016 – Dec 2022 | Vancouver, BC

Store Clerk at Tiger Sugar | Line Cook at Sanpoutei Ramen | Cashier at T&T Supermarket

- Career exploration & personal self-learning.
