Junior Full-Stack Developer with hands-on experience building scalable web applications using React, Node.js, Python, and AWS cloud services. Passionate about developing user-focused software, collaborating in Agile teams, and continuously learning modern technologies. Strong foundation in backend APIs, frontend development, authentication systems, and cloud-based deployment.

Education

Computer Systems Technology

01/2023 – 12/2024 | Burnaby, BC

British Columbia Institute of Technology (BCIT) 📄

Object-Oriented Programming, Data Structures & Algorithms, Cloud Computing with AWS, Software Architecture, Mobile App Development, Networking & Security, Serverless Computing

Bachelor of Transportation Technology and Management

09/2011 – 06/2015 | Taichung, Taiwan

Feng Chia University 📄

Professional Skills

Languages — JavaScript, TypeScript, HTML/CSS, Python, Java, C, Kotlin, R, SQL

Frameworks & Libraries — React, Node.js, Express.js, RESTful APIs, FastAPI, Tailwind CSS, Bootstrap

Databases & Tools — MySQL, MongoDB, Firebase, Git, Postman, Swagger/OpenAPI, Bash/Shell scripting, Figma

Cloud & DevOps — AWS, Docker, Kubernetes, Terraform, Jenkins, Linux (Ubuntu)

Projects

Course Scheduler

11/2024 – 12/2024

[React](#) | [Node.js](#) | [REST APIs](#) | [Tailwind CSS](#) | [AWS services](#)

- Built a full-stack academic scheduling platform using React, Node.js, and AWS services to support role-based course management for students, faculty, and administrators.
- Developed RESTful APIs and backend services to handle scheduling logic, authentication, and real-time timetable updates.
- Designed intuitive scheduling workflows and interactive interfaces to improve usability and timetable visibility for students and faculty with React and Tailwind CSS.
- Implemented secure CRUD operations and RBAC authorization to manage user access and scheduling workflows.
- Deployed scalable cloud infrastructure using AWS Lambda, API Gateway, and DynamoDB.
- Collaborated in Agile development workflows including peer code reviews, API testing, debugging, and iterative feature improvements.
- Wrote maintainable and well-documented code following RESTful API and frontend development best practices.

AI Steps

10/2024 – 11/2024

[Python](#) | [REST APIs](#) | [MySQL](#) | [OpenAPI/Swagger](#) | [LLM Integration](#)

- Developed backend API services in Python to process user requests and integrate LLM-powered recommendation workflows.
- Integrated external AI APIs and database operations to generate personalized location recommendations.
- Designed and documented RESTful endpoints using Swagger/OpenAPI for maintainability and team collaboration.
- Implemented authentication and protected API routes to improve application security.
- Performed API testing, debugging, and backend optimization to improve reliability and performance.

Experience

Cloud & Full Stack Developer - Intern

05/2024 – 05/2024 | Vancouver, BC

AWDEA (Adults with Disability Entertainment Access)

[React](#) | [Node.js](#) | [MongoDB](#) | [Stripe API](#) | [AWS Lambda](#)

- Contributed to a scalable full-stack nonprofit platform using React, Node.js, MongoDB, and AWS services to support accessibility-focused event workflows.
- Developed secure admin tools and integrated Stripe payment workflows, helping raise thousands of dollars in donations through the platform.
- Implemented authentication and RBAC authorization to improve user access management and platform security.
- Automated raffle selection and scheduling workflows using AWS Lambda and EventBridge, reducing manual administrative work.
- Improved application performance and user experience by optimizing content delivery through AWS CloudFront CDN.
- Collaborated in Agile development cycles, contributing to feature development, debugging, testing, and deployment.

Service industry experience

10/2016 – 12/2022 | Vancouver, BC

Store Clerk at Tiger Sugar | Line Cook at Sanpoutei Ramen | Cashier at T&T Supermarket

- Career exploration & personal self-learning.
